

am x-m subscriber. don't like the ldea of some one trying to take away my choice of entertainment and information. NAB must find a way to improve what they have and not prevent satallite radio from performing a valuable sevice. i subscribed to satillite radio because i can't stand commercials i any form. i havr the right to pay for a service if i choose to and be forced to listen to local stations to get information because they have yet to improve on their (i my opinion)substandard broadcasting service. let freedom of choice and information continue and tell the NAB they need to leave satillite radio be. if the NAB and its members can't improve on what they have, they need to close their doors or better yet, learn from satillite radio.
